Projects

School Website Development

May 2025

- Led a team of students to design and develop a new website for the school.
- Utilized HTML, CSS, and JavaScript to create a user-friendly interface, I used PHP for the database to create a complete website.
- I built an e-commerce website with a backend using Laravel, PHP, front-end, HTML, CSS and Bootstrat.
- I participated in the NASA Space Apps competition to design a climate website with a team.

Experience

- Full-stack developer experience gained from studying at WE School for three years, from 2023 to the present.
- Worked on real-life project ideas and UI designs.
- Working with a team and presenting in front of many people . **Nov 2025**
- I participated in a freelance project and managed the front-end user interface. **May 2024**
- Practiced Git & GitHub for version control.

Trainings & Courses

Life skills: positive thinking , Midocean University **dec 2025**
